About Smart Digital

Certified Experts

Smart Digital® is a low voltage contractor that specializes in structured networks and security. We install and configure voice and data networks, audio, security and access control. We are a veteran-owned company with a continuing education program for our technicians to stay current with certifications and training.

Staying Ahead Of The Technology Trends

Smart Digital® prides itself for always being one step ahead of technology trends. We offer cost effective, smart solutions that give you versatility and control of your home or business.

Everything Happens At The Network Rack

Our installed network solutions give our customers control over phone line precedence, computer and phone locations, and access control for any door in homes or businesses.

Smart Digital Offers Savings

We offer solutions for streaming audio, security and surveillance, which saves you money on your insurance policy. Contact us to see how we can improve your home or business.

Leader in innovative digital technology

SIMPLY MORE THAN SECURITY

Full Voice Response

The panel gives clear notifications that indicate system status, zone descriptions, alarms, and emergencies.

Date, Time & Weather Display

The panel scrolls through date, time, and real-time weather forecasts and severe weather alerts*

Quick Access

One touch access allows the quickest help possible in an emergency. The panel's LED buttons indicate the system's status.

Convenience

The fully self contained panel contains a snap-in GSM Radio, a 24-hr. backup battery, and allows 8 user codes to monitor up to 48 wireless zones and 2 hardwire zones.

Over-the-Air Updates

There's no need to worry about your panel's software getting outdated. With our Over-the-Air function, your panel will automatically be updated with the latest software.*

User Friendly LCD Touch Screen

The easy-to-use color touch screen puts a wide range of security and home automation controls at your fingertips.

Multiple Arming Options

Secure your home by arming your system "AWAY" or "STAY." The Quick Arm/Exit and Bypass features offer added convenience.

Home Automation

The panel's built in Z-Wave radio enables various home automation functions including HVAC, appliances, and lighting control.

Two-Way Response over Cellular

Two-way voice lets central station operators listen in and talk to you when a signal is received, ensuring that the proper emergency response personnel will be dispatched if necessary.

Remote Control Options

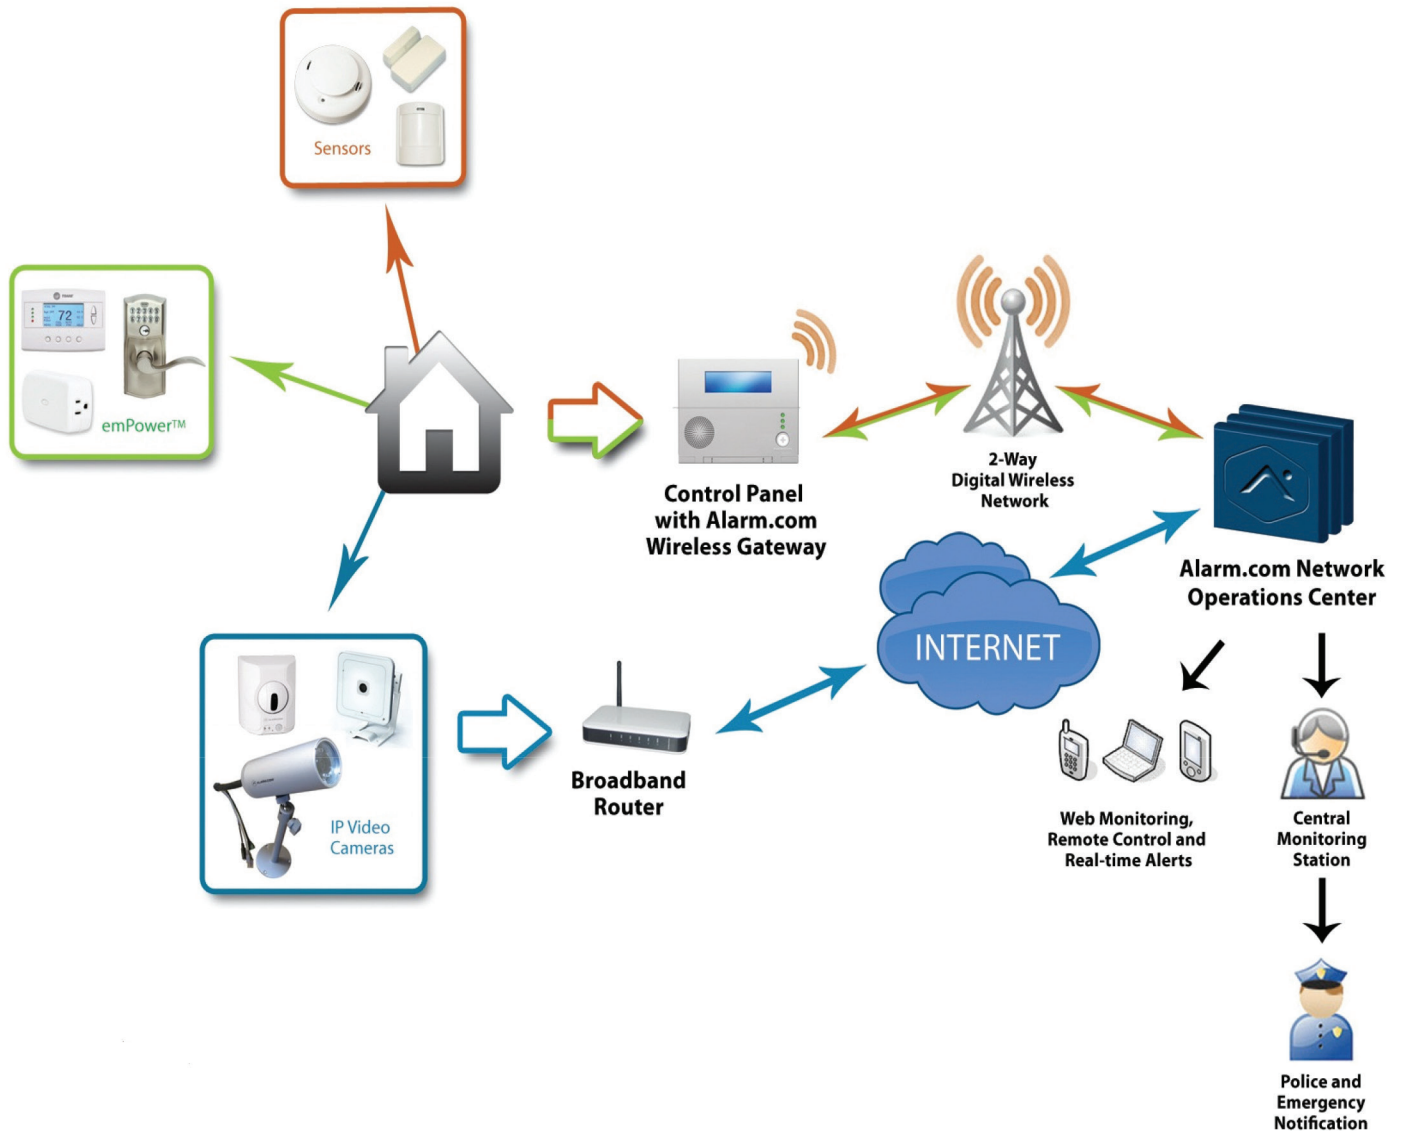

Always be in control by remotely managing your system from a computer or web-enabled mobile phone (Blackberry, iPhone, and Droid). *

How It Works

Connect and Protect

Smart Digital® provides the comfort of knowing your family and or business is protected with the best possible solution. Control your home or business through the web using your smart phone or similar device.

Services and Benefits

Remote Access

Wherever you are, Smart Digital® can configure remote access to your premises through the web from your smart phone or similar device. You can also receive notifications in the event of an alarm or unusual circumstance. Most insurance companies offer a discount on your homeowners or business policy.

Monitoring Solutions

Smart Digital® offers monitoring and remote access into your facility. Whether you need to look at the status of an order on your loading dock or receive notifications of malicious activity, Smart Digital® is your answer.

Services and Benefits

Theater & Presentation

Make effective presentations that your clients will remember. If you can dream it, it's possible. Smart Digital® designs the most sophisticated conference rooms that the market has to offer. Virtual offices are more and more in demand. Smart Digital® can design a conference room that will give you ability to video conference with your clients anywhere.
